5. Step-by-step guide.....	3
Step 1	3
Step 2	3
Step 3.....	3

1. Software needed

RKC uses **Zoom** - by visiting the URL for the webinar you will receive instructions on how to join - we strongly recommend [you install the desktop version](#) of the Zoom client which will ensure a better quality interaction.

2. Hardware needed

- devices
 - i. any computer with a microphone/webcam and obviously an internet connection will normally do

ROBERT KENNEDY COLLEGE

- ii. a smartphone/tablet may be a viable alternative; Zoom do have an app for either Apple or Android
- accessories
 - i. **headphones** (highly recommended!)
 - ii. high quality microphone (optional)
 - iii. webcam (most laptops' integrated webcams will do).

3. Timezone considerations

Please use the RKC OnlineCampus to “synch your watch” to the Zürich time zone. Nothing is more frustrating than being late to the online webinar by one hour and hearing everyone say “bye now!”

Welcome to the RKC OnlineCampus!

4. Webinquette™

To ensure a high-quality experience during the webinar, we ask you to please keep in mind the following points:

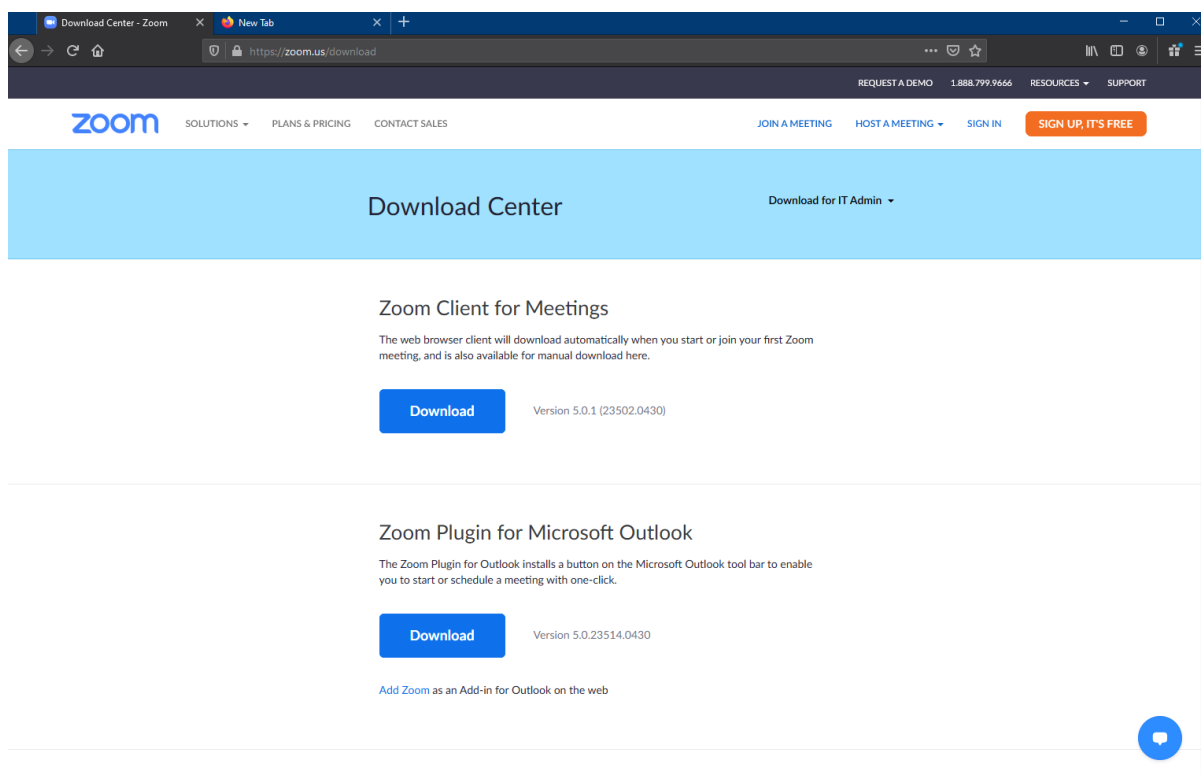

- **join the session 15 minutes early** to be able to work through any technical difficulties you may come across. Once the session starts, getting technical help will be less straightforward.
- **use headphones** for the best chance to hear everyone well and limit echo/feedback
- **keep your microphone muted** when not addressing the group – you can temporarily unmute yourself by pressing the SPACE key while talking.

5. Step-by-step guide

Step 1

If this is the first time you try to join a webinar using Zoom, [download and install the Zoom app \(Windows, Mac, Android, or Apple iPhones/iPads\)](#)

Step 2

If asked to make a choice, select “Connect using computer audio”.

Step 3

Mute your microphone when not addressing the group (and **remember to re-enable it** when you start speaking by pressing – and keeping it pressed while you speak – the SPACE key)

ROBERT KENNEDY COLLEGE

Choose ONE of the audio conference options

Phone Call

Computer Audio

Join with Computer Audio

Test Speaker and Microphone

Automatically join audio by computer when joining a meeting

Thank you for reading - and best of luck.
